PORT ADELAIDE COMMUNITY OPPOSING AUKUS (PACOA)

What is PACOA calling for?

- An independent sovereign policy free of US ties and influence.
- Stronger diplomatic and economic ties with non-aligned neighbour nations.
- No nuclear waste facility at Osborne or Port Adelaide.
- No nuclear waste transported via Port Adelaide.
- No nuclear dumps commissioned in South Australia.
- Keeping Port Adelaide from being a target under a US led war.
- Diverting the cost for education and training for domestic industries.
- Diverting the \$368 Billion dollar cost to housing, health and education.
- Diverting the cost to suitable Australian defence and not US military led acts of aggression.
- Stopping Australia becoming a US submarine fleet base.

The federal Government is maintaining AUKUS will go ahead as planned but it is becoming obvious we will not be receiving nuclear subs as the US and UK programmes cannot even meet their own requirements.

Instead, the US have used AUKUS to establish more bases here and to turn Australia into an expanded US military garrison with plans to launch an attack on China. Follow PACOA for developments as they unfold.
